Statement of Compliance

Since 1998, Small World Toys has been testing our products at third party accredited testing labs to all federal and state requirements as well as the once voluntary ASTM testing standards.

All of our products are in compliance with the current federal laws as well as to the August 2009 Consumer Product Safety Improvement Act (CPSIA) requirements for lead (90 ppm in surface coating/300 ppm in substrate) and phthalate content (.1%). They meet ASTM F963-07 testing standards, as well as 16 CFR testing for lead, flammability, small parts, mechanical hazards, and our own requirements for phthalate content (.1%) as well as all state and federal requirements for children's products.

If you have questions, comments or are in need of further information regarding our commitment to product safety and compliance or the CPSIA requirements, please email us at productsafety@smallworldtoys.com.

Sincerely,

A handwritten signature in black ink, appearing to read "John Nelson", set against a light blue dotted background.

John Nelson

Chief Executive Officer
